BEST UGR FOR OFFICE

SLIDER-F

A B O U T - S L I D E R - F

The new SLIDER-F has been developed inspired by our popular luminaire SLIDER. SLIDER-F retains the characteristic slim design and ensures a high lumen output.

Equipped with the innovative RASTER, SLIDER-F achieves maximum efficiency with unique freedom from glare. The technology of this sophisticated reflector produces very little glare and offers optimum visual comfort. In addition to a better UGR, the innovative RASTER has a significantly higher central light intensity compared to a normal OPAL diffuser.

SLIDER-F therefore guarantees ideal lighting conditions for a comfortable and productive working environment.
